We designed shop frontages and decals, interior layouts, and posters for new premises, and created all promotional materials such as social media posts, email campaigns, and advertisements.

For Pinewood Relocations, we revamped their brand identity from scratch. We designed a captivating logo, sleek stationery, engaging social media posts, and compelling promotional materials for this innovative global relocations company based in London, UK.

**Sylvia McIntosh**  
DRESSMAKER & DESIGNER

We gave Sylvia McIntosh's brand a fresh new look with a stunning logo, elegant business cards, and stylish merchandise. We also created vibrant social media posts, chic tags, and strategic ads to attract new customers and enhance brand recognition.

For The Operational Research Society, we elevated their visual identity by designing their monthly magazine "Inside OR," along with dynamic brochures, vibrant flyers, impactful event promotions, and engaging educational outreach materials.

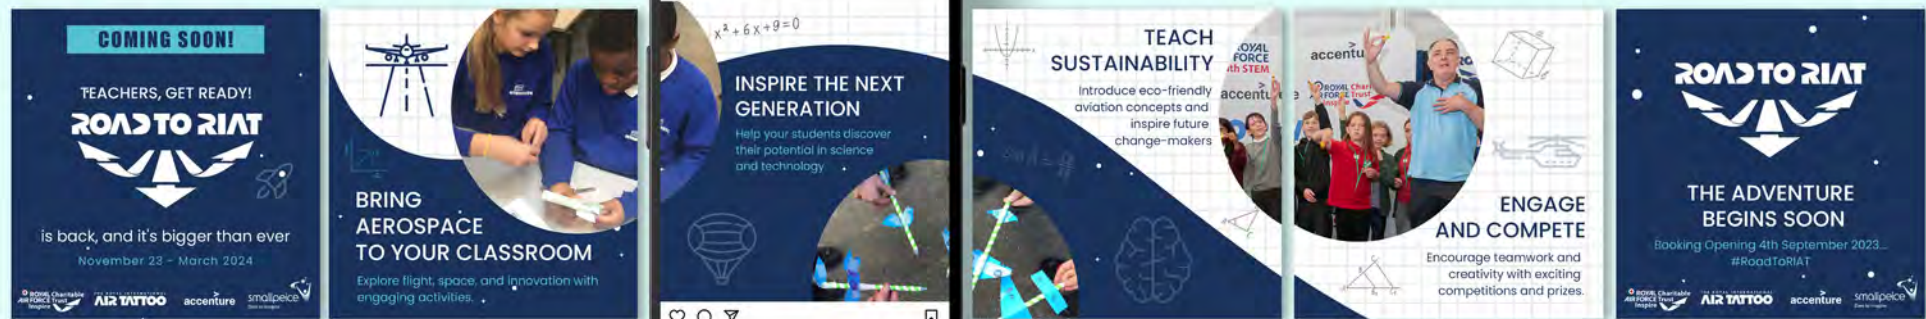

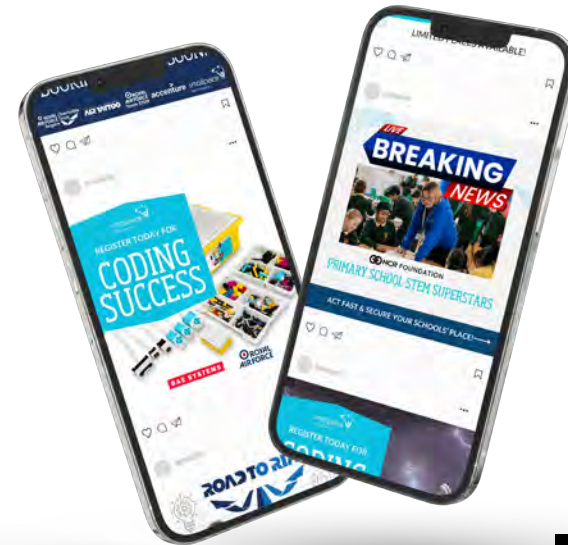

We boosted Ignite Hub's visibility on social media and increased their branding presence in libraries by designing posters and pull-up banners. We also created merchandise like badges, tote bags, and bookmarks, and designed their Just Giving account to encourage more donations.

We boosted The Smallpeice Trust's social media presence and email campaigns by introducing sliding social posts, engaging video posts, and eye-catching animated GIFs. These dynamic and visually appealing elements helped capture the audience's attention and drive more interaction.

We designed attractive packaging, clear price lists, informative brochures, and vibrant promotional materials like flyers and posters. Our packaging boosted product appeal, while the brochures and price lists were easy to understand and navigate. The eye-catching flyers and posters effectively promoted events and special offers, drawing more attention to our clients' businesses.

We partnered with a graduate designer to create a standout landing page for a new fashion collection. We designed and developed the page using HTML, CSS, and JavaScript. This innovative design was showcased at a prestigious Hong Kong conference and received high praise from Sainsbury's management.

We used user experience

X research to design a user-centric website for Pinewood Relocations. We developed and built the site on WordPress, integrating HubSpot and using advanced analytics to continually optimise the user experience.

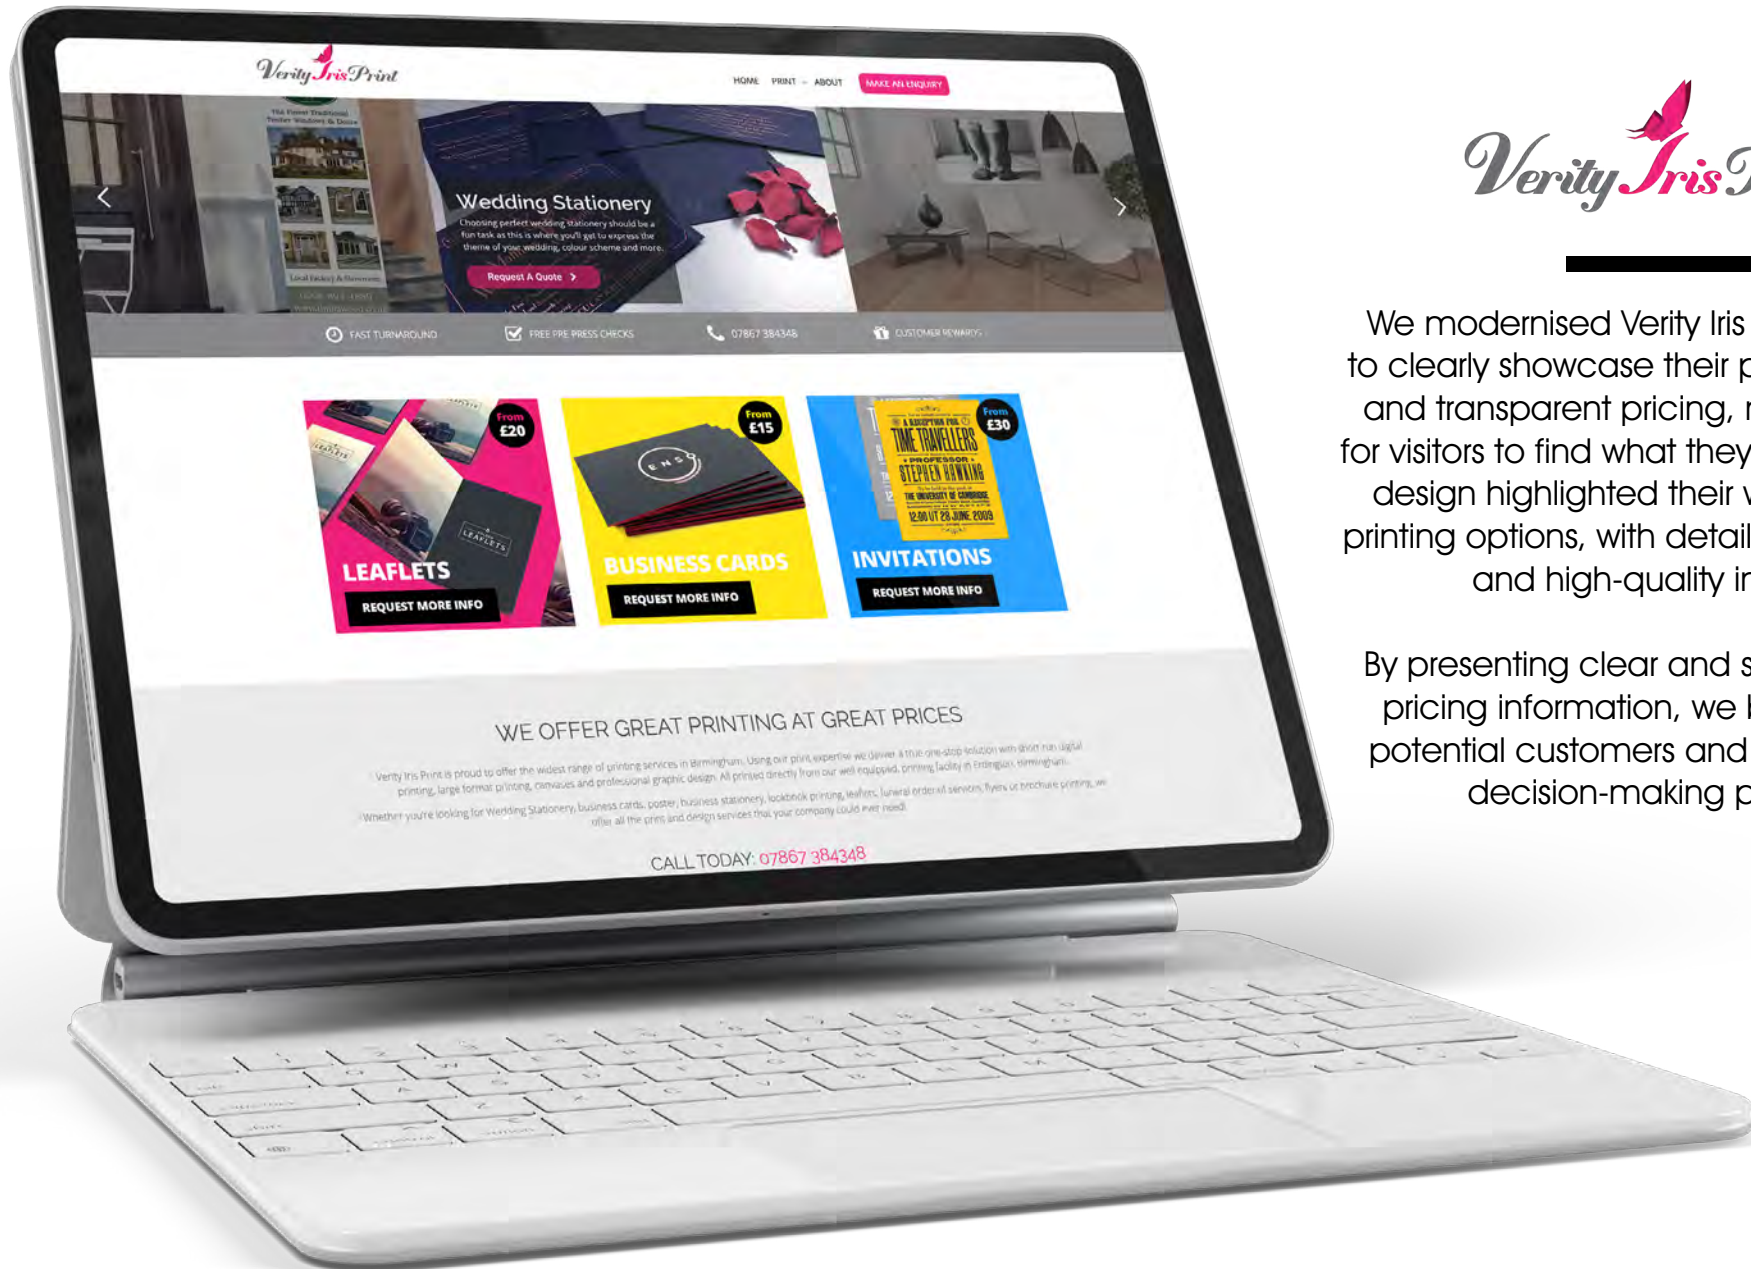

THE OPERATIONAL RESEARCH SOCIETY

We transformed The Operational Research Society's training purchasing system by developing an efficient, user-friendly portal. We integrated a cutting-edge platform into their existing website, making it easy for the training manager to handle courses and delegates, streamlining the entire process.

We modernised Verity Iris Print's website to clearly showcase their printing services and transparent pricing, making it easy for visitors to find what they need. The new design highlighted their wide range of printing options, with detailed descriptions and high-quality images.

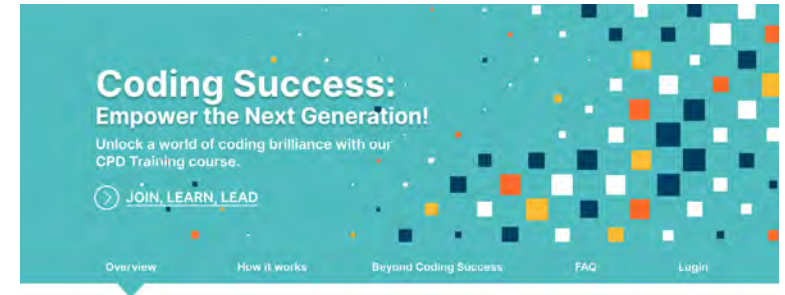

By presenting clear and straightforward pricing information, we built trust with potential customers and simplified the decision-making process.

BEFORE

We led a web redesign for Coding Success, a charity inspiring kids in engineering. We conducted thorough UX research and created an intuitive, visually appealing design in Figma, dramatically increasing school participation in their educational outreach programmes.

AFTER

Discover Coding Success  
Your Gateway to the Future of Education!

Experience the exciting world of Coding Success, a program for primary and secondary schools. This program provides lesson plans and LEGO Education SPIKE Prime kits for ages 8-14 to make learning more fun and interesting.

Teachers in England, Scotland, and Wales receive hands-on training and resources through Coding Success, which is fully funded by BAE Systems and the Royal Air Force. It's more than just a programme; it's an opportunity to put not only yourself but your school at the forefront of educational innovation. Shape the next generation of scientists, engineers, and tech enthusiasts.

With flexible training dates and three units to choose from with a new unit added every year, we ensure a seamless fit for your busy schedule. So, why wait? Empower your teaching journey, inspire young minds, and lead the way in this digital age. Together, let's craft a brighter, tech-savvy future with Coding Success.

TAILORED LEARNING PATHS FOR YOUR STUDENTS

Teachers, enjoy the flexibility to curate the ideal learning journey for your pupils. You will begin with the Coding Success 3 Electrified! project, but then have the option to use the other projects on offer. You can hand pick any combination of lessons, be it just one or the entire selection. Moreover, each lesson can be adapted to fit your students' unique learning needs and levels.

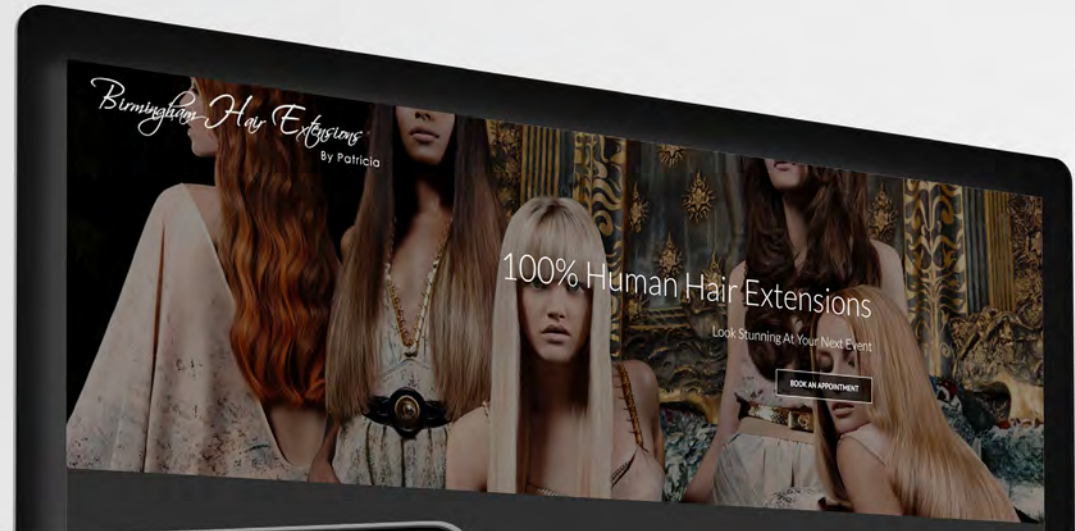

There are 300 primary and 300 secondary school places available, and places will be allocated on a first come first served basis against criteria to ensure a good regional spread and to encourage participation from a wide range of students.

We revamped Birmingham Hair Extensions' website to clearly showcase their services and pricing, making it easier for visitors to find what they need. The new design included detailed descriptions and quality images of their hair extensions.

We also improved the site's SEO, helping it appear on the first page of Google. These changes boosted customer trust and significantly increased inquiries and engagement.

We re-branded St Albans' logo and website. Since they offer a lot of services, navigation was key. We designed the website to reflect their personality and provide valuable information to the community.
